

Welcome to Corda Day

David E. Rutter,  
CEO and Founder, R3

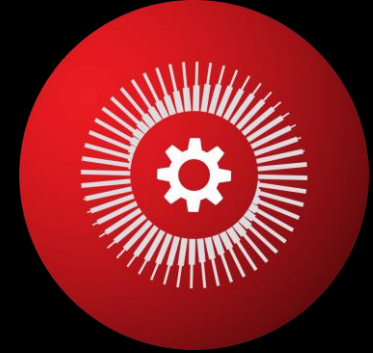

# The new digital economy is at an inflection point

Convergence of traditional  
and digital finance

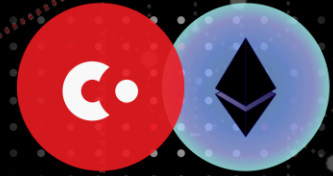

Rising interest in digital  
assets and digital  
currencies

Regulated institutions  
can transform legacy  
processes with DLT

# Bridging DeFi and regulated financial markets to unlock value

- Openness, connectivity and trust are the backbone of the digital economy
- Interoperability across public and private chains—applications, systems and standards—is critical
- R3 is in development on non-traditional digital assets moving from Ethereum onto a regulatory compliant Corda-based network

# Future of money and greater financial inclusion

- CBDCs can deliver a more efficient, faster and safer financial system when powered by DLT
- Rising interest in stablecoins from banks and financial market infrastructure providers as they can co-exist alongside CBDCs

BANK NEGARA MALAYSIA  
CENTRAL BANK OF MALAYSIA

HONG KONG MONETARY AUTHORITY  
香港金融管理局

Monetary Authority  
of Singapore

NATIONAL BANK OF KAZAKHSTAN

# 2022 saw ground-breaking Corda-powered initiatives and more customers reap the benefits of production

The world's first digital bond was issued on SDX's FINMA-regulated digital asset exchange

DTCC chose Corda as the foundational technology for Project Ion to settle equity trades in T+1

Euroclear chose Corda for its new Digital Financial Market Infrastructure initiative

Tokenized, sustainable assets

Digital cash cross-border solution in production

Interbank reconciliation across the entire Italian banking system

# Looking ahead to 2023

Delivering on our Corda promise of connectivity, scalability and flexibility

Informed by the voice of real-world customers in production

Making Corda even more sustainable in the years to come

Next generation of Corda = future proofed + easy to build on today

- Modular design—“start small and grow big”
- Highly performant and fit for purpose for production in regulated industries
- Lower cost of ownership
- Paves the way for trusted bridges to public blockchain networks

Join us in shaping the future of  
regulated markets

- Don't let this digital evolution pass you by
- Keep challenging the status quo, keep pushing for innovation
- Real change happens when we come together as a collective force

Thank you
